AREAS OF INTEREST

Back-End Developer

PROJECTS

The **Shopping Management System**, Java, OOPS Concept, Stream API, Collection Framework, The Shopping Management System is a console-based Java application for managing customer purchases, inventory, and administrative tasks in retail. It offers a seamless interface for purchases, order tracking, and returns, with secure admin access for stock updates. Leveraging core Java features like OOP, collections, and time management, it ensures efficient operations and is ideal for small-scale retail management.
